Selectmen of Atkinson.

AUDITORS' REPORT

We have examined the accounts of the Tax Collector, Town Treasurer, Selectmen including the Todd Poor Fund, Trustees of Trust Funds, and find them correctly cast, with vouchers.

The Auditors recommend that the Tax Collector report no taxes as paid by the town unless he has received actual payment from the town, and recommend that the Treasurer pay orders only by check, even if cashing the same, which would compel deposit of all funds received. Also that he enter all bank deposits in the column set apart for the same in the cash book, and keep the balance there, and recommend, in accordance with the expressed desire of the Tax Commission of the State, that the selectmen compel the payrolls of all road agents to be returned to them containing signatures of the employees thereon, or individual receipts attached thereto.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Board and Citizens of Atkinson:

Herewith I submit to you my third annual report, together with the reports of Music Supervisor, Mrs. Eva W. Thompson and School Nurse, Miss Helen Thomas.

We were very fortunate in having the teachers of last year all return for another year. There is a decided advantage in retaining the services of satisfactory teachers as long as possible.

There were 90 pupils enrolled in the schools last year. This is 11 less than the enrollment of year before last. The attendance averaged 94 per cent of the membership. This was about the average for the state for this period. The following table shows the number of pupils in attendance in the Atkinson schools during the last four years:

Number of pupils enrolled in 1926	86
Number of pupils enrolled in 1927	95
Number of pupils enrolled in 1928	101
Number of pupils enrolled in 1929	90

Five pupils graduated from the eighth grade last June and all of these entered High School. It now frequently happens that nearly all of the graduates enter High School. The great majority of parents feel that their children should at least have a High School training. This is indicative of the conviction regarding actual worth of the time spent in High School. At the present time there are about twenty-five hundred High School graduates annually in this state; of these about one half go on

to post secondary institutions. This indicates that the High School is no longer the end of educational necessities and desires.

No one of our buildings meet the requirements of the standard school building. A standard school building is a building equipped with a jacketed heater or furnace, adjustable single desks for pupils, and either flush or chemical toilets. All of our buildings have jacketed stoves; and for the most part, improved desks. The toilets are unimproved. The majority of the rural schools in other districts are equipped with chemical toilets. These toilets greatly improve the sanitary condition. Something should be done each year toward making the buildings standard.

The number of children at the center makes necessary two schools. As long as the School Board can rent a room from the Trustees of the Academy the school house problem is a simple one. However, if the enrollment at the Academy should increase to the point that this room is needed then the district would have to provide another school room. That would probably mean remodeling the village school into a two room building. At Hampstead, Plaistow, Newton, and to a certain extent at Salem, the seventh and eighth grades are brought together to a central building. The results in these places are school advantages for these grades that would not be possible under former arrangements. If such a plan could be worked out at Atkinson, similar advantages would result.

An increasing number of school districts in this state have been arranging a school calendar which would provide for thirty-six actual weeks of school. We are at the present time about one week short of this ideal.

New Hampshire has had a decade of exceptional educational progress, and the State Board of Education, un-

der the leadership of its chairman, Orton B. Brown, and State Commissioner, Ernest W. Butterfield has had an interesting and important review of the achievements of the ten years.

At a meeting held recently at the Concord High School and at which meeting nearly three hundred school board members and superintendents attended, the following facts were emphasized:

New Hampshire adopted a new school code in 1919, which has been in operation for ten years. The code has raised the quality of the schools in the less favored districts, financially. It magnified need of higher efficiency in the rural and elementary city schools. It gave added power and increased support to the State Department of Education, especially authorized it to create standards of attainment for secondary and private schools.

The code of 1919 provided equal length of school year for cities and rural communities, and no school in the state is in session less than thirty-six weeks. Now boys and girls in the most remote districts in New Hampshire are as well prepared for high school as those of the cities. The high school attendance increased forty per cent in ten years, and twice as many high school students go to college as ten years ago. The high school enrollments have increased six times as many as in elementary schools.

In 1919 few one-room schools had a teacher who had a normal school education; now a majority of these schools are taught by normal school graduates. In 1919 many children were far from high school opportunities; now 90 per cent are within easy driving distance of a high school. Now all schools have the advantage of school superintendents who are college graduates, who have taught at least five years, who have satisfactory personal and professional records, and give their entire time to school supervision.

No new untrained teachers are employed and only untrained teachers of successful experience are retained.

Before 1919 one-fifth of the schools changed teachers during the year. The mid-year change of teachers in 1919 was 540. In 1928 it was only 98.

In nothing has there been greater progress than in the professional service rendered by the State Normal Schools at Plymouth and Keene. They are graduating students from the four-year course and every graduate is engaged in the state at once. They also graduate students from two-year and three-year courses for elementary and junior high schools, and they are all employed in the state.

In only eight of the forty-eight states is the state tax for local public schools as low as in New Hampshire. In the state five times as much tax money is paid teachers as is expended for school buildings; and twenty-six times as much for teachers as for all administrative expenses.

The children and teachers at Atkinson are well equipped with modern books and supplies. School books were never so attractive and interesting as at the present time. Parents have noticed this and often speak about it.

The work of the schools is progressing well this year. Achievement tests given at intervals, show that good progress is being made. Our schools are engaged in moral training all day long. Character education is a by-product of all other education and far more important than the direct product. Children reflect in their behavior the influences that reach them. To spend five or six hours a day in a class room where the virtues of courtesy, politeness, kindness, sympathy, unselfishness, thoughtfulness, orderliness, truthfulness, sincerity, industry, patience and justice are practised unconsciously; is of inestimable moral value.

In conclusion I would thank the School Board for their generous support and commend the time and energy that they have expended so generously for the good of the schools. I would also commend the effective and loyal work of the teachers in guiding the pupils forward on the road to citizenship. The work of the year has been very pleasant.

Respectfully submitted,

WILLIAM J. NELSON,

Superintendent of Schools.

REPORT OF SUPERVISOR OF MUSIC

To the Superintendent and School Board of Atkinson:

I herewith submit my annual report as supervisor of music:

Two new sets of books were added at the beginning of the school year, "Juvenile Music" by Ginn & Co., for grades three and four. "The Fourth Book of Songs" by Foresman for grades six, seven, and eight. The latter contains many beautiful two and three part songs which the boys and girls thoroughly enjoy.

The work in musical appreciation proves very interesting to all. This work is carried on with the aid of the Victrola and picture charts of the instruments of the orchestra. In May a music memory test was given the list being made up of ten well known classics, by noted composers.

At the Academy the boys and girls are enjoying "Three-Part Music" a book by Ginn & Co., which was new at the beginning of the 1929 term.

For the co-operation afforded me in my work I extend my thanks to the Superintendent, School Board, and Teachers.

Respectfully submitted,

EVA W. THOMPSON,

Supervisor of Music.
